

Meridian Kiosks

mBOX Automated Locker System

AS SEEN AT NRF 2018 WITH 

mBOX Automated Locker System

Meridian's mBOX Locker System provides secure, kiosk managed storage to simplify product pickup and improve customer experience.

1

Order

Customers can order their items online or by using a mobile app and schedule in-store pick up.

2

Prepare + Place

Once the order is ready, an employee places the item in the appropriate pre-selected locker.

3

Pick Up

When the customer arrives, they can go straight to the automated locker system, enter their 10-digit code or scan their QR code and the appropriate locker will open with their order inside.

By skipping the order and checkout line, customers save time and workplace efficiency increases.

benefits

increase order capacity | streamline order and pickup processes

decrease store congestion | no more waiting in long lines

reduce overhead | increase order output without increasing costs

instant gratification | order online, pickup immediately

time efficient ► customer satisfaction ► increased customer base

Shown, Center: Cabinet Module with Transparent Plexi Doors

Shown, Right: Molded Panel with LED and Graphic Lettering

modular design

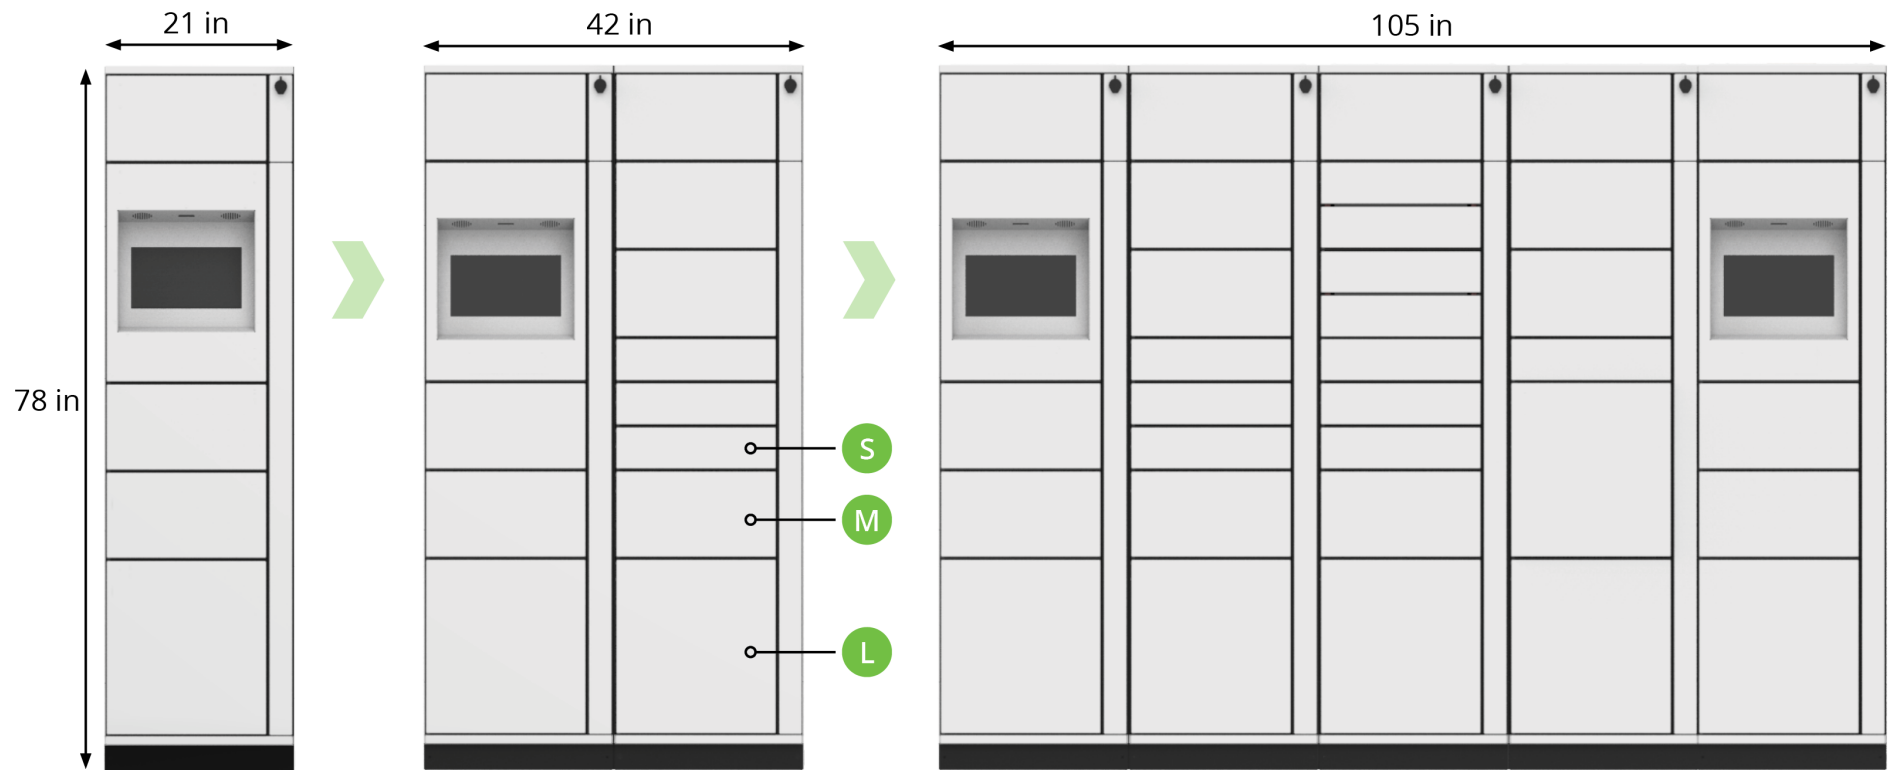

a design approach that subdivides a system into smaller parts called modules, that can be independently created and then used in different systems or configurations.

Modular Design

The mBOX Automated Locker System is built using cabinet modules, creating a completely future-proof design with multiple levels of customization available. Choose the height, width, depth and locker size to meet the needs of your organization.

Standard Locker Sizes

Locker Size	Internal Dimensions (in)			Size Combinations
	H	W	D	
S	3.4	15.5	22.3	S + S = M
M	8.3	15.5	22.3	M + M = L
L	18	15.5	22.3	2X S + M = L

* Additional Sizes Available
